

Curriculum intent: Health and Social Care provides pupils with the skills and knowledge that enables them to make a valuable contribution to society, and to progress in the workplace. It provides pupils with interesting key information that will be required to function effectively in their own day to day life and to support in the lives of others.

Curriculum rationale: Pupils will develop the necessary skills, knowledge and understanding to broaden their experience and understanding of the subject and the varied progression options available to them in the future. Pupils look at the **key concepts and values that are required in health and social care** and other related professions including **Human Lifespan Development** and factors that affect it in either a **positive or a negative way**. **Care values and the values that underpin health and social care** and finally **Health and Wellbeing**, where pupils develop an understanding of the ways **health and wellbeing can be improved**, but also the reasons why people may be unable to do this.

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
9	Humanities Rotation: Health & Social Care – Introduction and key concepts and key concepts and values that are required in health and social care
